Profile Summary

MCA graduate (CGPA: 8.59/10) with hands-on experience in full-stack application development and a strong understanding of end-to-end application logic. Skilled in implementing user authentication, database operations, and seamless integration between frontend and backend components through real-world projects.

Skills

- Soft Skills : Time management , Adaptive learning, Problem solving
- Technical Skills : Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite, MySQL, Git, GitHub, Django REST Framework Basics, OOP, Data Structures & Algorithms, Docker

Internships

Python Trainee , Softroniics , July 2023 – January 2024 (6 months) | Malappuram , Kerala

Responsibilities

- Complete projects using Python-Django
- Technologies HTML , CSS , JavaScript ,Python , SQLite

Academic Qualification

- Master of Computer Applications – KMCT Institute of Technology and Management , Malappuram
CGPA 8.59 | May 2026
- Bachelor of Science in Computer Science – Majlis Arts and Science College , Malappuram
CGPA 6.59 | March 2024

Projects

FeedNeed

- Developed “FeedNeed”, a web-based platform enabling users and organizations to donate, request, and track food items efficiently.
- Implemented role-based modules allowing normal users and organizations to manage donations and requests with real-time tracking.
- Enabled admin to monitor and analyze system activities using data visualization through interactive graphs for better decision-making.

Daily Job

- Developed “Daily Job”, a web-based application designed to simplify and digitalize the process of hiring labours for short-term or daily jobs in local areas.
- Implemented role-based modules for Admin, Labor, and Customer, enabling secure registration, job posting, and request management with real-time updates.
- Integrated map-based location service and chat system to enhance communication and accessibility between customers and labours.

Workshops

- Generative AI – NXTwAVE | Online , November 2024
Learned about the different types of Artificial Intelligence and how each type serves unique purposes in real-world applications
- Tata - Cybersecurity Analyst Job Simulation – TATA , Forage | Online June 2025

Certifications & Courses

- Machine Learning Introduction for Everyone-IBM
Introduces machine learning and data science for everyone with a foundational understanding of machine learning models.
- Python for Beginners – NIT
Basic concepts of python programming
- Data Base Management System – NPTEL
Learned core concepts of database design, SQL, normalization, and transaction management.
